About MatesCONNECT

If you've recently been diagnosed with prostate cancer, our MatesCONNECT program can connect you to a trained volunteer who understands what you're going through.

All of our volunteers have been through prostate cancer.

When you call MatesCONNECT, you can ask to speak with a volunteer who knows from first-hand experience what it's like to live with prostate cancer.

You can get practical advice on surgery and treatment, and the side effects of treatment, such as incontinence, erectile dysfunction, and coping with Androgen Deprivation Therapy.

A free, confidential program to help you manage prostate cancer.

All you need to do is pick up the phone.
